3A/4A Adaptive COT Synchronous DC-DC Buck Converters

The AP65355/AP65455 are adaptive constant on-time (aCOT) mode synchronous buck converters providing high efficiency, excellent transient response and high DC-output accuracy for voltage regulation in digital TVs and monitors.

The aCOT control scheme handles wide input/output voltage ratios and provides a low external component count. The AP65355/AP65455 supports a seamless transition between continuous conduction mode (CCM) at higher load conditions and discontinuous conduction mode (DCM) at lighter -load conditions for high efficiency.

The AP65355/AP65455 operate at a fixed 650KHz to achieve good output stability.

These devices also feature programmable soft-start, UVLO, OTP, high-voltage tolerance EN Pin and OCP to protect the circuit.

The AP65355/AP65455 are available in DFN3030-10.

The Diodes' Advantage

▪ Synchronous DC-DC Buck Converter with Continued Load Current of 3A/4A

- Increases efficiency in light -load condition
- Standard industry pin-out

▪ Protection

- Overcurrent protection
- Thermal shutdown
- UVLO & high voltage tolerance EN pin
- Improves robustness of circuit and prevents premature failure

▪ Adaptive COT Mode

- Fast transient response
- No need for external compensation

Applications

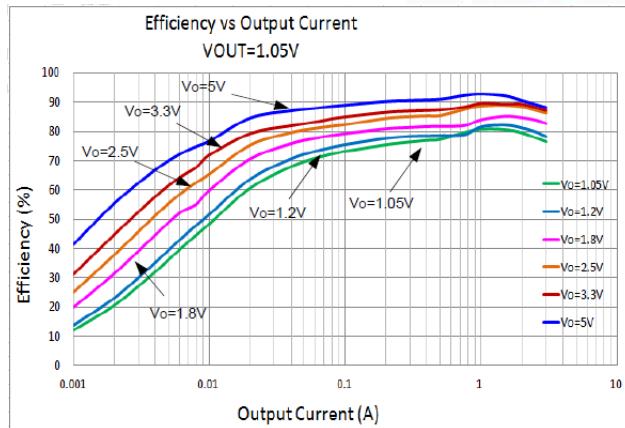

- Game Consoles
- TVs and Monitors
- Set-Top Boxes
- Network Systems
- Distributed Power Systems
- Home Audio
- Consumer Electronics
- Green Electronics
