

STGW33IH120D

30 A - 1200 V - very fast IGBT

Features

- Low saturation voltage
- High current capability
- Low switching loss
- Very soft ultra fast recovery antiparallel diode

Applications

- Induction cooking, microwave oven
- Soft switching application

Description

This IGBT utilizes the advanced PowerMESH™ process resulting in an excellent trade-off between switching performance and low on-state behavior. This device is well suited for the resonant or soft switching application.

4 Package mechanical data

In order to meet environmental requirements, ST offers these devices in ECOPACK® packages. These packages have a lead-free second level interconnect. The category of second level interconnect is marked on the package and on the inner box label, in compliance with JEDEC Standard JESD97. The maximum ratings related to soldering conditions are also marked on the inner box label. ECOPACK is an ST trademark. ECOPACK specifications are available at: www.st.com
