

**Part Change for Marktech Optoelectronics LEDs**

Announced March 15, 2016, (Updated August 29, 2018)

Effective Immediately

The following parts are affected by this announcement:

**All TO metal-can type products using the "P" type and "NJ" type lens caps**

**(See B-NJ product list --- page 2 below --- for a descriptions of all current affected items)**

**DESCRIPTION OF CHANGE**

Effective immediately - Marktech Optoelectronics has obtained a new source for the "P" type and "NJ" type lens caps used on all TO metal-can devices

The reason for the change is that the original supplier has discontinued manufacturing this product. A new source in Japan will now be supplying these lens caps.

**NOTE: Based on current backlog and estimated forecasts, there is sufficient stock to maintain production until the end of 2016**

**IMPACT OF CHANGE**

Marktech Optoelectronics believes this change will be transparent to the majority of customers / end users. The lens caps are made to the same original specification, however, in some cases, the optical performance may vary slightly. It is the recommendation of Marktech engineering that all customers be informed of this change and new samples be provided for evaluation.
