<ul> <li>Description and Purpose of Change:</li> <li>MaxLinear has qualified TSMC wafer foundry in order to facilitate long term support of the product line. The process has been optimized to produce very similar characteristics as the currently shipping devices from Silan foundry and will meet existing datasheet specifications.</li> <li>There are no changes to assembly location.</li> <li>There are no changes in the package BOM</li> <li>There are no changes to device reliability</li> <li>Note: Users who rely on DC, diode characteristics during ICT testing should take caution certain I/O characteristics may appear changed due to the proprietary I/O structures employed by TSMC. These DC / diode characteristic differences are not guaranteed nor required to ensure full design functionality per datasheet. Adjustments at ICT testing may be required to prevent false failures.</li> </ul>			<ul> <li>Die Technology</li> <li>Wafer Fabrication</li> <li>Assembly Process</li> <li>Equipment</li> <li>Material</li> <li>Testing</li> <li>Manufacturing Site</li> <li>Data Sheet</li> <li>Yield Enhancement</li> <li>Other:</li> </ul>		
Reliability/Qualification Summary: Reliability reports available upon request.
