

Product/Process Change Notice - PCN 19_0181 Rev. -

Analog Devices, Inc. Three Technology Way Norwood, Massachusetts 02062-9106

This notice is to inform you of a change that will be made to certain ADI products (see Appendix A) that you may have purchased in the last 2 years. **Any inquiries or requests with this PCN (additional data or samples) must be sent to ADI within 30 days of publication date.** ADI contact information is listed below.

PCN Title: ADN4605 Assembly Site Transfer and Data Sheet Revision
Publication Date: 21-Aug-2019
Effectivity Date: 23-Nov-2019 *(the earliest date that a customer could expect to receive changed material)*

Revision Description:
Initial Release.

Description Of Change:

- 1) Change of package type from Super Ball Grid Array (SBGA) to Thermally Enhanced Ball Grid Array (BGA_ED)
- 2) Change die interconnect type from Wire Bond (WB) to Flip Chip (FC)
- 3) Assembly site transfer from AMKOR Philippines to STATS ChipPAC Korea
- 4) Change in overall package thickness from 1.7mm max to 2.04mm max
- 5) Change in data sheet includes a change in Package Outline Drawing (POD) and thermal resistance section. See attached detailed change description.

Reason For Change:

Due to laminate obsolescence; Amkor, Philippines is shutting down their line for this type of package. The use of ADI qualified STATS ChipPAC, Korea as an assembly site for this package will ensure continued source of product supply. ADI's assembly subcontractors manufacture our products using Analog Devices specified manufacturing flows, process controls and monitors. This assures that our customers receive the same level of quality and reliability on products they receive from qualified ADI manufacturing locations

Impact of the change (positive or negative) on fit, form, function & reliability:

The height of the product has increased as noted in the Description of Change field. There is no change to the functionality or reliability of the product. The revised product is fully pin and code compatible.

Summary of Supporting Information:

Qualification has been performed per Industry Standard Test Methods. See attached Qualification Results Summary. Product data sheet changes will be reflected in Rev B of the Product Data Sheet.
