

SKYWORKS®

Timing Solutions

PRODUCT SELECTOR GUIDE

Timing Solutions

Skyworks offers a broad portfolio of timing products that enable hardware designers to simplify clock generation, clock distribution, jitter attenuation and network synchronization. These products combine best-in-class jitter performance and frequency flexibility, enabling customers to easily architect optimized clock tree solutions. Custom samples are available in 1-2 weeks, easing design and reducing time-to-market.

Timing

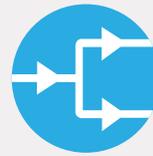

A comprehensive portfolio of oscillators, clock buffers, clock generators, PCI Express (PCIe) clocks, jitter attenuators and SyncE/IEEE 1588 clocks.

Products

Oscillators

- Any frequency up to 3.0 GHz
- Ultra-low jitter: 80 fs RMS
- Short lead times: 1-2 weeks (samples)

Clock Buffers

- Integrated format/level translation
- Ultra-low additive jitter: 50 fs RMS
- PCI Express Gen 1/2/3/4 compliant

Clock Generators

- Any-frequency, any-output
- Ultra-low jitter: 70 fs RMS
- Clock tree on a chip replaces clocks and XO's

Jitter Attenuating Clocks/ Network Synchronizers

- Any frequency, any output
- Ultra-low jitter: 70 fs RMS
- Clock tree on a chip replaces clocks, XO's, VCXO's

Applications

- Enterprise routers
- Cable/DSL
- PON

- Base stations
- Small cells/DAS
- Backhaul/Fronthaul

- Switches/servers
- Storage/security
- Search acceleration
- Machine learning

- Broadcast video
- Industrial
- Medical imaging
- Test and measurement
- Emulation & prototyping
- Aerospace and defense

- Data center interconnect
- 100G/400G/800G Optical Transport
- WDM
- Carrier Ethernet

- ADAS/Automated Driving
- Networking Gateways
- Domain Controllers
- Centralized Compute
- Lidar and vision systems
- IVI/Digital Cockpit

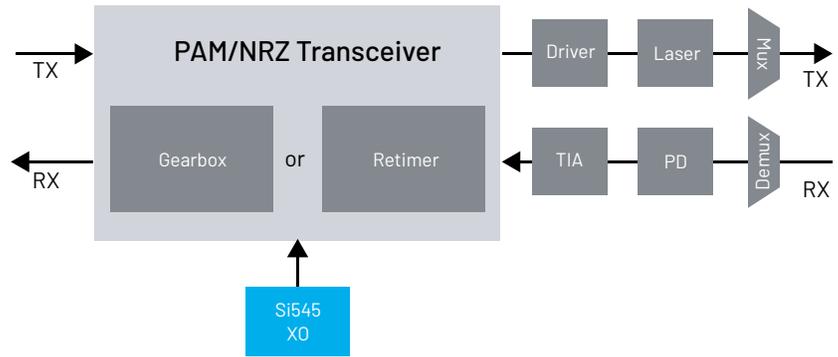

Crystal Oscillators (XO)

Skyworks offers a comprehensive portfolio of high performance, low jitter XOs and VCXOs. Skyworks' new Si54x and Si56x Ultra Series™ family of high performance XOs delivers ultra-low jitter and frequency flexibility. All devices are highly customizable, with samples of any XO available with 1-2 week lead times.

Portfolio Key Features

- Industry's lowest jitter any frequency XOs
- Jitter as low as 80 fs RMS typ
- Any frequency up to 3.0 GHz
- Single, dual, quad and I2C prog. options
- LVPECL, LVDS, HCSL, CML, LVCMOS
- Superior stability vs. SAW oscillators
- Power supply noise rejection eliminates discrete LDO
- Single device supports 1.8 – 3.3 V operation
- -40° to +85° C operation
- 5x7 mm, 3.2x5mm, 2.5x3.2mm
- Samples in 1-2 weeks

Example Application: 100G/200G/400G Optical Module

Voltage-Controlled Crystal Oscillators (VCXO)

Skyworks offers a comprehensive portfolio of high performance, low jitter XO's and VCXO's. Skyworks' new Si56x Ultra Series™ family of high performance VCXO's deliver exceptional jitter performance and 5x tighter control voltage linearity than competing solutions, maximizing design margin while simplifying development. All devices are highly customizable, with samples of any VCXO available with 1-2 week lead times.

Portfolio Key Features

- Jitter: 100 fs RMS typ (12 kHz - 20 MHz)
- Any frequency up to 3.0 GHz
- Single, dual, quad and I2C prog. options
- LVPECL, LVDS, HCSL, CML, LVCMOS
- Superior linearity vs. traditional VCSO/VCXO's
- Power supply noise rejection eliminates discrete LDO
- 1.8, 2.5 or 3.3 V
- 5x7 mm, 3.2x5 mm
- -40° to +85° C operation
- Samples in 1-2 weeks

Example Application: Video Format Converter

Clock Generators

Skyworks offers the industry's lowest jitter, most frequency flexible, most highly integrated clock generators. Leveraging Skyworks' proven MultiSynth technology, a single clock generator can replace an entire clock tree of multiple oscillators, buffers, clock generators, and muxes, simplifying design and accelerating time to market. Skyworks' comprehensive clock generator portfolio offers optimized solutions for communications, data center, industrial and consumer applications.

Portfolio Key Features

- Ultra-low jitter as low as 69 fs RMS
- Generate any combination of frequencies
- Lowest jitter fractional clock synthesis
- Programmable format per output
- LVPECL, LVDS, HCSL, CML, LVCMOS
- Programmable VDDO per output
- Power supply noise rejection eliminates discrete LDO
- PCIe Gen 1/2/3/4/5 compliant
- Custom samples in 2 weeks
- ClockBuilder® Pro support

Example Application: Data Center Ethernet Switch

Clock Buffers

Skyworks offers a comprehensive portfolio of clock buffers. In addition to universal buffers that support any in/out signal format translation, we offer a wide range of differential and single-ended buffers that provide ultra-low additive jitter and low skew clock distribution. Skyworks also offers a broad range of low-power PCIe buffers that integrate all termination components while providing compliance with PCIe Gen 1/2/3/4 standards.

Portfolio Key Features

- Ultra-low additive jitter as low as 50 fs RMS
- Clock distribution up to 1.25 GHz
- LVPECL, LVDS, HCSL, CML, LVCMOS
- Pin-selectable signal format
- Individual clock output OE control
- Synchronous, glitchless OE control
- Best-in-class power supply noise rejection
- PCIe: push-pull HCSL drivers
- PCIe: integrated termination resistors
- PCIe: Gen 1/2/3/4 compliant
- PCIe: Intel-qualified solutions

Example Application: Switch/Router

Jitter Attenuating Clocks

Skyworks offers the industry's lowest jitter, most frequency flexible, most highly integrated jitter attenuating clock generators. Leveraging Skyworks' proven DSPLL® and MultiSynth technology, a single jitter attenuating clock can synchronize to a wide range of different clocks, filter jitter, and provide any combination of output frequencies. Skyworks offers an extensive range of jitter attenuating clocks to solve the most complex timing challenges in 100G+ packet optical transport and Ethernet designs.

Portfolio Key Features

- Generate any combination of output frequencies
- Ultra-low jitter as low as 69 fs RMS
- Enhanced hitless switching
- Programmable loop bandwidth down to 0.1 Hz
- Programmable format per output (LVPECL, LVDS, HCSL, CML, LVCMOS)
- Programmable VDDO per output
- Power supply noise rejection eliminates discrete LDO
- Custom samples in 2 weeks
- ClockBuilder Pro support

Example Application:

Wireless Clocks

Skyworks offers the industry's most highly integrated clocking solutions for radio access networks, replacing two devices with a single IC while simplifying the overall BOM. Leveraging Skyworks' proven DSPLL and MultiSynth technology, a single jitter attenuating clock can synchronize to a wide range of different clocks, filter jitter, and generate LTE, Ethernet and general-purpose clocks from a single device. All PLL components are integrated on-chip, eliminating the need for discrete VCXOs, XO's and loop filters in the design.

Portfolio Key Features

- Ultra-low phase noise
- Replaces multiple clock IC's and VCXO's
- Generates LTE & Ethernet clocks from single IC
- No external loop filter
- Integrated crystal option
- Noise floor: -165 dBc/Hz
- Power supply noise rejection eliminates discrete LDO
- Custom samples in 2 weeks
- ClockBuilder Pro support

Example Application: Small Cell / DAS

Network Synchronizers (Synchronous Ethernet / IEEE 1588)

Skyworks offers standards-compliant synchronization clocks that lead the industry in terms of jitter performance and power consumption. These products combine network synchronization and jitter attenuation functions in a single device, enabling single-IC designs for pizza box Carrier Ethernet switches/routers and BBU control card applications.

Portfolio Key Features

- Ultra-low jitter as low as 100 fs RMS
- Programmable loop bandwidth down to 1mHz
- Each DSPLL generates any output frequency
- Support for 1PPS/1Hz input and output
- Synchronous, free-run, holdover modes
- Automatic/manual hitless switching
- Pin or SW-controlled 1588 DCO (1 ppt/step)
- Meets G.8262 (SyncE), G.812, G.813
- Suitable for ITU-T G.8273.1 T-GM, G.8273.2
- T-BC, T-TSC
- ClockBuilder Pro support

Example Application: Telecom Boundary Clock

AEC-Q100 Automotive Grade Timing Products

Skyworks offers a comprehensive portfolio of automotive grade 2 timing solutions, providing system designers with solutions that simplify clock tree design, add redundancy, reduce system points of failure, increase system reliability and optimize the performance of high-speed serial data transfer in automotive infotainment, advanced driver assistance systems (ADAS), Lidar/radar sensors and automated driving ECU platforms.

Portfolio Key Features

- 6/8/12-output clock generators
- Multi-format clock buffers
- PCIe Gen1/2/3/4/5 clocks and buffers
- SmartClock™ health monitoring
- -40°C to +105°C, AEC-Q100 qualified
- ClockBuilder Pro support

Example Application:
